**CIRCULAR**

As per the directions of the Government of India under digital India initiative programme, the University has adopted DigiLocker to provide access of digital certificates to all the students. Thus, the digital certificates of students can be uploaded by the University on to DigiLocker only if the student's Aadhar details in College Examination Management System (EMS) are perfectly matched with the details on the Aadhar card.

So, we need to understand about problems that persist at student end while downloading certificates. In this regard, we are sharing the “**JNTU-DigiLocker Integration Problems Form**” with all principals, and request all pricipals to conduct some special drives to educate students about DigiLocker and enable Digilocker accounts. If any student is failed to download certificates, principals are requested to submit the form for that student by choosing appropriate option in the form.

Treat this as Most Urgent and your cooperation is highly solicited in this regard.
